

DATA 601: Introduction to Data Science

Dr. Ergun Simsek

Fall 21

E-mail: simsek@umbc.edu

Office Hours: **Wednesdays, 9:30 am – 11:30 am**

Office: ITE 325 K

Web: **Course's Github Page**

Class Hours: M 7:10-9:40pm

Class Room: Performing Arts & Humani 107

- I respond to messages within 48 hours, excluding breaks and weekends.
- If your question is something about your code or something we covered in class then please don't send me email, instead schedule an appointment with our tutors. You can see our tutors' schedules at [here](#).

Course Description

This class prepares students for more advanced topics in data science and introduces some of the tools and notions which are frequently used in the industry. Topics include: a review of Python programming and most fundamental modules; acquisition, handling, and working with different data; exploratory data analysis with statistics; data visualization and web scraping; life cycle of data science projects and different roles in a data science team, and ethical issues in data science.

Student Learning Outcomes

By the end of this course, successful students will be able to:

1. Describe the key activities in a data science project and understand the role of modeling in a data science project.
2. Use popular Python packages for exploratory data analyses, data visualization, and transformations.
3. Create functions and programs that clean, merge, and transform raw data sets and evaluate their quality for a given data science project.
4. Apply basic statistical knowledge in a data science project to test and verify hypotheses.
5. Apply best practices of communication for reporting upon completing a data science project.

Format and Procedures

This will be an in-person course and depending on the pandemic situation there might be on-line (synchronous) components. Computers with internet connection and working cameras are required for the online lectures. We will also be using a software called **Colaboratory Notebooks** as the main medium of delivery for the lecture materials. For more information and to get familiarity with it, [please check this tutorial](#). In addition to these:

1. Students will complete assigned homework, readings, quizzes.
2. Students will engage with hands-on labs and practical exercises to prepare them for challenges they may encounter in the workplace.
3. Students will occasionally present their solutions to homework assignments in class.
4. Students who are participating in the class online should be able to share both their video and audio.

Course Requirements

Textbook

We will not be following one single textbook in this course. Weekly reading materials and relevant course materials will be shared beforehand via Blackboard and/or the course's Github repository. In addition to these, I will be following the logical structures of the following textbook.

- **Python Data Science Handbook**: We will follow this book in the programming with Python parts of the course. The sections related to Pandas library are especially well written.

Hardware Requirements

- Web browser capable of running technical notebooks
- A computer with sufficient internet speed for online lectures. Make sure that your computer has video and microphone access.

Quizzes

There will be some quizzes in the beginning of the lectures to assess students' understanding of the reading assignments. Also, at the end of some lectures, students will be given quizzes to assess their understanding of the covered material.

Homework

There will be homework assigned to students roughly every two weeks. Depending on the scale of the homework, students will be given one or two weeks to submit their homework and other than exceptional circumstances this homework will be graded within a week.

Attendance

In every lecture, I will take attendance at some point during the lecture. Students who miss this part of the lecture will be considered as absent and except for medical situations (or some other formal/written excuse) no excuse will be accepted for missing a class. Attendance will contribute to 10 percent of the final grade.

Grading

In the final grade, the assignments will have the following weights:

Quizzes (9 quizzes total)	—	40%
Homework (6 HW total)	—	50%
Participation & Engagement	—	10%

Grading Distribution

Final letter grades will be assigned as follows: (Grades will be rounded upwards.)

94-100	—	A
93 - 90	—	A-
87 - 89	—	B+
83 - 86	—	B
80 - 82	—	B-
77 - 79	—	C+
73 - 76	—	C
70 - 72	—	C-
67 - 69	—	D+
0 - 59	—	F

Schedule and weekly learning goals

The schedule is tentative and subject to change.

Week 01, 09/20 - 09/24: Introduction to DATA601 and data science

- Course logistics, resources and policies.
- Introduction and review of basic tools.
- Overview of the course: what you will learn and what we will not cover.
- Coding Basics: Naming conventions, objects and their methods, built-in functions etc.

Week 02, 09/27 - 10/01: Basics of visualization with Python

- Visualization with matplotlib
- Figure, axis, titles, labels etc.
- Adding subplots to a figure
- Bar charts and box plots

Week 03, 10/04 - 10/08: Data transformations

- Installing and importing pandas
- Dataframes vs series
- Choosing an observation
- Choosing a variable
- Renaming, dropping a column, sorting values in a column
- Boolean mask and filtering
- Detecting missing values
- Describe, info, etc.

Week 04, 10/11 - 10/15: Data Transformations - Part-II

- Operations on series: $+$ / $-$ / $*$, log, ranking, cutting etc.
- Grouping and aggregation
- Vectorized string operations
- Pivot tables

Week 05, 10/18 - 10/22: Exploratory data analysis

- Variation
- Typical values
- Unusual values
- Heatmaps
- Patterns and models

Week 06, 10/25 - 10/29: Loading and wrangling data

- Introductions to different data formats
- Reading csv, excel, html files
- Handling numbers
- Handling strings
- Working with dates and times
- Tidying data

Week 07, 11/01 - 11/05: Relational data

- Merging, concatenation, joining datasets.

Week 08, 11/08 - 11/12: Working with strings

- String operations
- Exact matches
- fuzzy matches

Week 09, 11/15 - 11/19: Working with date and time

- Timezone handling
- Moving Averages
- Resampling methods for time series
- Time series visualizations

Week 10, 11/22 - 11/26: Basics of object oriented programming

- Introduction to classes and objects
- Global variables
- Inheritance

Week 11, 11/29 - 12/03: Web Scraping and API

- Basic HTML
- Best Practices of Web Scraping
- Use and Benefits of APIs

Week 12, 12/06 - 12/10: Modeling

- Place of modeling in a data science project
- Linear Regression
- Visualizing Models

Week 13, 12/13 - 12/17: Report and Communication

- Structure of a Data Analysis Write-up
- Project Structure and Deliverables
- Reproducibility
- Project Structure and Deliverables

Course Policies

During Class

Please be mindful that the COVID-19 pandemic is not over yet and everyone has different levels of concerns. This is why UMBC policies constitutes a common denominator that I expect everyone to follow in my classes. I ask everyone to be proactive about this and do their fair share in order to keep our community safe and protected. Moreover if you have any concerns about this topic please don't hesitate to share it with me immediately.

I understand that the electronic recording of notes will be important for class and so computers will be allowed in class. Please refrain from using computers for anything but activities related to the class. Phones are prohibited as they are rarely useful for anything in the course. Eating and drinking are allowed in class but please refrain from it affecting the course. Try not to eat your lunch in class as the classes are typically active.

Policies on Incomplete Grades and Late Assignments

Late/incomplete assignments will be accepted if an extension has been agreed to in advance. Emergency situations will be handled on a case by case basis with appropriate justification or documentation.

Incomplete grades are granted only for extenuating circumstances and your request is made before the last week of class.

Institutional Policies

Covid-19 Policies

Please see [this Google doc](#) for UMBC Policies and Resources during COVID-19.

Academic Integrity and Honesty

By enrolling in this course, each student assumes the responsibilities of an active participant in UMBC's scholarly community in which everyone's academic work and behavior are held to the highest standards of honesty. Cheating, fabrication, plagiarism, and helping other to commit these acts are all forms of academic dishonesty, and they are wrong. Academic misconduct could result in disciplinary action that may include, but is not limited to failure, suspension or dismissal.

Refer to the UMBC policy on Academic Integrity: [UMBC Academic Integrity Policy](#)

Diversity Statement

It is my intent that students from all diverse backgrounds and perspectives be well-served by this course, that students' learning needs be addressed both in and out of class, and that the diversity that the students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful of diversity: gender identity, sexuality, disability, age, socioeconomic status, ethnicity, race, nationality, religion, and culture. Your suggestions are encouraged and appreciated. Please let me know ways to improve the effectiveness of the course for you personally, or for other students or student groups.

Student Disability Services

UMBC is committed to eliminating discriminatory obstacles that may disadvantage students based on disability. Services for students with disabilities are provided for all students qualified under [the Americans with Disabilities Act \(ADA\) of 1990](#), [the ADAAA of 2009](#), and [Section 504 of the Rehabilitation Act](#) who request and are eligible for accommodations. The Office of Student Disability Services (SDS) is the UMBC department designated to coordinate reasonable accommodations that would allow students to have equal access and inclusion in all courses, programs, and activities of the University. If you have a documented disability and need to request academic accommodations, please register with the Office of Student Disability Services (SDS) as soon as possible. To begin the registration process please visit the SDS website and review the registration information, including disability documentation

guidelines and how to submit the SDS registration form online using the confidential data management software called [Accommodate](#).

Once accommodations have been approved, you and your instructors will be notified via an emailed accommodation letter from the SDS office. Both the SDS office and Shady Grove's [Center for Academic Success\(CAS\)](#) will work with you to ensure you receive the approved accommodations. If you have any questions or concerns, please contact the [Office of Student Disability Services SDS](#) via disAbility@umbc.edu or phone at 410-455-2459. Please note that accommodations are not retroactive and begin once SDS sends an approved accommodation letter. For more information on the services CAS provides, please contact Mary Gallagher (maryg@umd.edu) or visit [Student-Services/Center for Academic Success](#)

Title IX Statement

Any student who has experienced sexual harassment or assault, relationship violence, and/or stalking is encouraged to seek support and resources. There are a number of resources available to you. Please see [The Office of Equity and Inclusion Website](#) for recently updated UMBC Policies and Resources during COVID-19.

With that said, as an instructor, I am considered a Responsible Employee, as per [UMBC's Interim Policy on Prohibited Sexual Misconduct, Interpersonal Violence, and Other Related Misconduct](#). This means that while I am here to listen and support you, I am required to report disclosures of sexual assault, domestic violence, relationship violence, stalking, and/or gender-based harassment to the University's Title IX Coordinator. The purpose of these requirements is for the University to inform you of options, supports, and resources.

You can utilize support and resources even if you do not want to take any further action. You will not be forced to file a police report, but please be aware, depending on the nature of the offense, the University may take action.

- [The Counseling Center](#). phone: 410-455-27742 (M-F 8:30am - 5pm)
- [University Health Services](#): 410-455-2542 (M-F 8:30am - 5pm)
- For after-hours emergency consultation, call [the police](#) at 410-455-5555

Other on-campus supports and resources:

- [The Women's Center](#)(available to students of all genders): 410-455-2714 (M-Th 9:30am -6pm, F 9:30am - 4pm)
- [Title IX Coordinator](#): 410-455-1606 (M-F 9am - 5pm)

If you need to speak with someone in confidence about an incident, UMBC has the following Confidential Resources available to support you:
